

ENGINEERING DESIGN SERVICES

ENGINEERING DESIGN SERVICES

Thanks to our experts from various fields with outstanding achievements in several sectors, our design, engineering, and simulation services will ensure responsiveness and seamless interoperability in your business, while allowing you to reduce overall operational costs. Centered on efficiency and results, our multidisciplinary team is known for adapting quickly to customer requirements and undertaking any project from smaller to larger scale. Our reputation is flawless: we will respect your deadlines, your budget, and your mandates.

Drive Your Engineering FOWARD!

● ENGINEERING

Our experts know how to obtain short and long-term results by adopting a forward-thinking and pragmatic approach to all engineering challenges, from conception to completion

Project Management

Mechanical

Electrical

Automation

Dimensional Management

● DESIGN

MRO Engineering's design and product development services provide access to professionals with the expertise and tools you need to design innovative, high-quality products that are tailored to your market, while reducing operating costs and eliminating unnecessary risks.

● SIMULATION

All product development processes can benefit from numerical simulation services, which can help you solve your problems and better guide your decisions. MRO Engineering is here to assist you in achieving better performance and higher quality by optimizing your design and manufacturing methods.

– **Finite element analysis (FEA)**

– **Testing and prototyping**

– **Computational fluid dynamics (CFD)**

STAFF OUTSOURCING

Our staff outsourcing services offer a team of versatile, skilled and conscientious professionals to help overcome any challenge. MRO Engineering ensures quality work and extremely fast turnaround times
